DETAILED ACTION

Priority

This application is a 371 of PCT/US04/35805 10/27/2004, which claims benefit for domestic priority under 35 U.S.C. § 119(c) [to a provisional application 60/515,537 10/28/2003], is acknowledged.

Status of Claims

Claims 1-40 are currently pending in the application.

Receipt is acknowledged of amendment / response filed on April 13, 2009 and that has been entered.

Claims 19-40 are withdrawn from further consideration pursuant to 37 C.F.R. 1.142 (b) as being drawn to a non-elected subject matter.

Information Disclosure Statement

Receipt is acknowledged of Information Disclosure Statement (IDS), filed on 10/23/2008, which has been entered in the file.

Response to Election/Restriction

In response to the restriction requirements, Applicants have elected Group I, which includes claims 1-18 drawn to a compound of formula, and the elected species as set forth and disclosed in Example 1-31, on page 44 of the specification (Response, page 1), with traverse is acknowledged. Applicant's arguments (to withdraw restriction among Groups I-IV) have been fully considered and found unpersuasive at this time because the Invention groups I-IV differ materially in structure and in element from each other and therefore, are capable of supporting their own patents.

The invention Groups I-IV each relate to a set of structurally diverse and dissimilar compounds [having different variable groups, which are attached directly and indirectly to the formula], compositions comprising compounds, and their methods of use, which do not possess a substantial common core wherein a reference anticipating one would not necessarily render the other obvious. The core does not define a contribution over the art. The ring structure of formula is further substituted by different variables, which are broadly defined and when the compound of formula is taken as a whole, a plethora of vastly different compounds are possible. Thus, these features are not considered 'special technical features' under PCT rules 13.1 and 13.2. Hence, the unity of invention is considered to be lacking and restriction of the invention in accordance with the rules of unity of invention is considered to be proper.

In addition, 35 U.S.C. 372 (b)(2) clearly states that unity of invention may be reexamined under 35 U.S.C. 121. Restriction was based on PCT Rule 13.1, 13.2 and Annex B part 1(b) together with 37 CFR 1.475 and 1.499 for lacking unity of invention because of lacking a significant structural element qualifying as the special technical features.

PCT Rule 13.2 states that the international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept (requirement of unity of invention).

PCT Rule 13.2 states that unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features.

Annex B (2)(V) when dealing with alternatives, if it can be shown that at least one Markush alternative is not novel over the prior art, the question of unity of invention shall be reconsidered by the Examiner. Reconsideration does not necessarily imply that an objection of lack of unity shall be raised. If the Examiner finds one of the inventions unpatentable over the prior art the evidence or admission may be used in a rejection under 35 U.S.C. 103 (a) of the other invention. Nevertheless, the Examiner may reconsider to rejoin methods of use claims commensurate in scope with the product claims when the case would be found in condition for allowance [provided those method claims are free from 35 U.S.C. §112 first (including written description, reach-through claim language and/or scope-enablement issues) and second paragraphs]. For these reasons, Applicant's arguments are found unpersuasive and, since 35 U.S.C. 101 allows one patent per invention, the requirement for restriction (election of species) is still deemed proper.

Applicants preserve their right to file a divisional on the non-elected subject matter.

As set forth in the restriction requirement and an election of a single compound (or set of compounds), the invention will encompass all compounds that fall within the scope of the search is as follows:

A compound of the formula wherein:

R¹ is claimed,

Y is cycloalkyl group,

Ar¹ is an aryl group,

R² and R³ are as claimed,

Z is as claimed,

Ar² is limited to heteroaryl group,

R⁴ and R⁵ are as claimed and all other variables are as defined.

As a result of the election and the corresponding scope of the compound identified, claims 19-40 and the remaining subject matter of claims 1-18 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn subject matter of claims 19-40 is properly restricted as it differs materially in structure and in element from the elected subject matter supra so as to be patentably distinct there from.

Objections

Claims 1-18 are objected to for containing non-elected subject matter. The claims should be amended to exclude non-elected subject matter and within the scope of elected compound.
